## PROJECTS

### Project name

### Description

HS construction  
(Mobile application)

This is a construction business application. From here, owner can see and edit his equipment price. And seller can see only the selling prices. And from here owner can store documents. And also, there are some cft mazements system.

<https://www.youtube.com/watch?v=1gK83FCcFXw>

Banglalir khabar  
(Desktop application)

This is an authentic food distribution system. From here people can buy authentic food from authentic seller. Seller can manage his/ her Portal and order. This is a very easy to use.

<https://www.youtube.com/watch?v=iJ8bZKTxl8s&t=44s>

Bepartner  
(Web application)

This is a website-based application. It's goal is buildup an interest-free business, that is Halal and Blessed. It's mission-vision is to help new entrepreneurs and start-ups. From this website, entrepreneurs can meet with investors who can give them an investment with no interest but they will take shear of their company/business. From here investors can find new ideas and if they want, they can invest in those particular ideas/start-ups. And it will be helpful for entrepreneurs and investors also. And new entrepreneurs can know how many investors are working on those topics. This web-based application can reduce unemployment and build up entrepreneurs and new start-ups. This application is easy to use. And this application is made for every type of person who has basic knowledge about the internet and browsing.

Bepartner  
(API based application)

This is similar as "Bepartner (Web application)". But here I use ASP.net technology. This is an API based application. For backend development I use ASP.net.
